HustleHub+

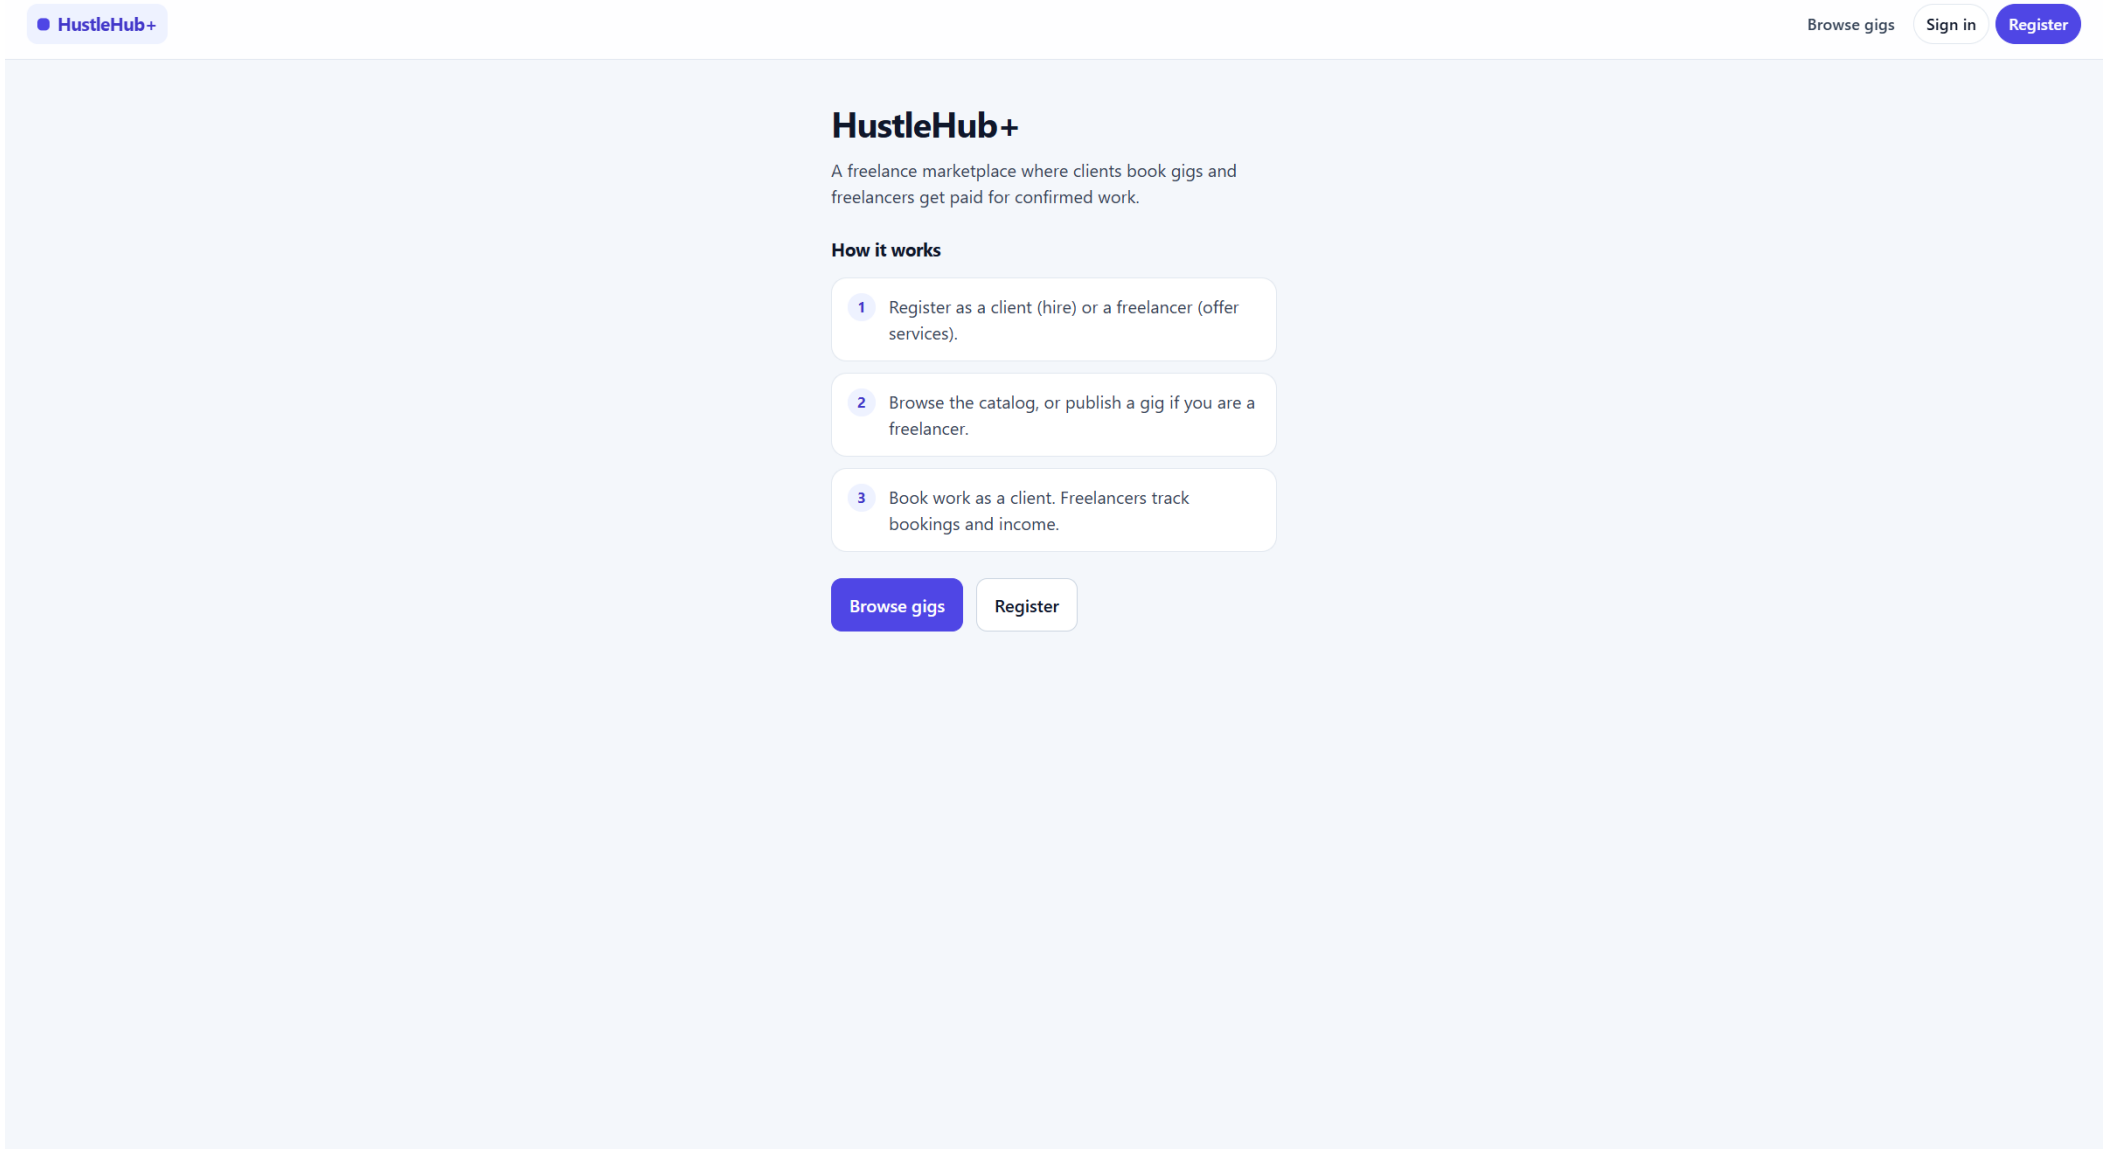

High-level walkthrough

Guest, client, and freelancer. Browse a gig, book it with a simulated payment, then publish a gig and see the income.

12 October 2026

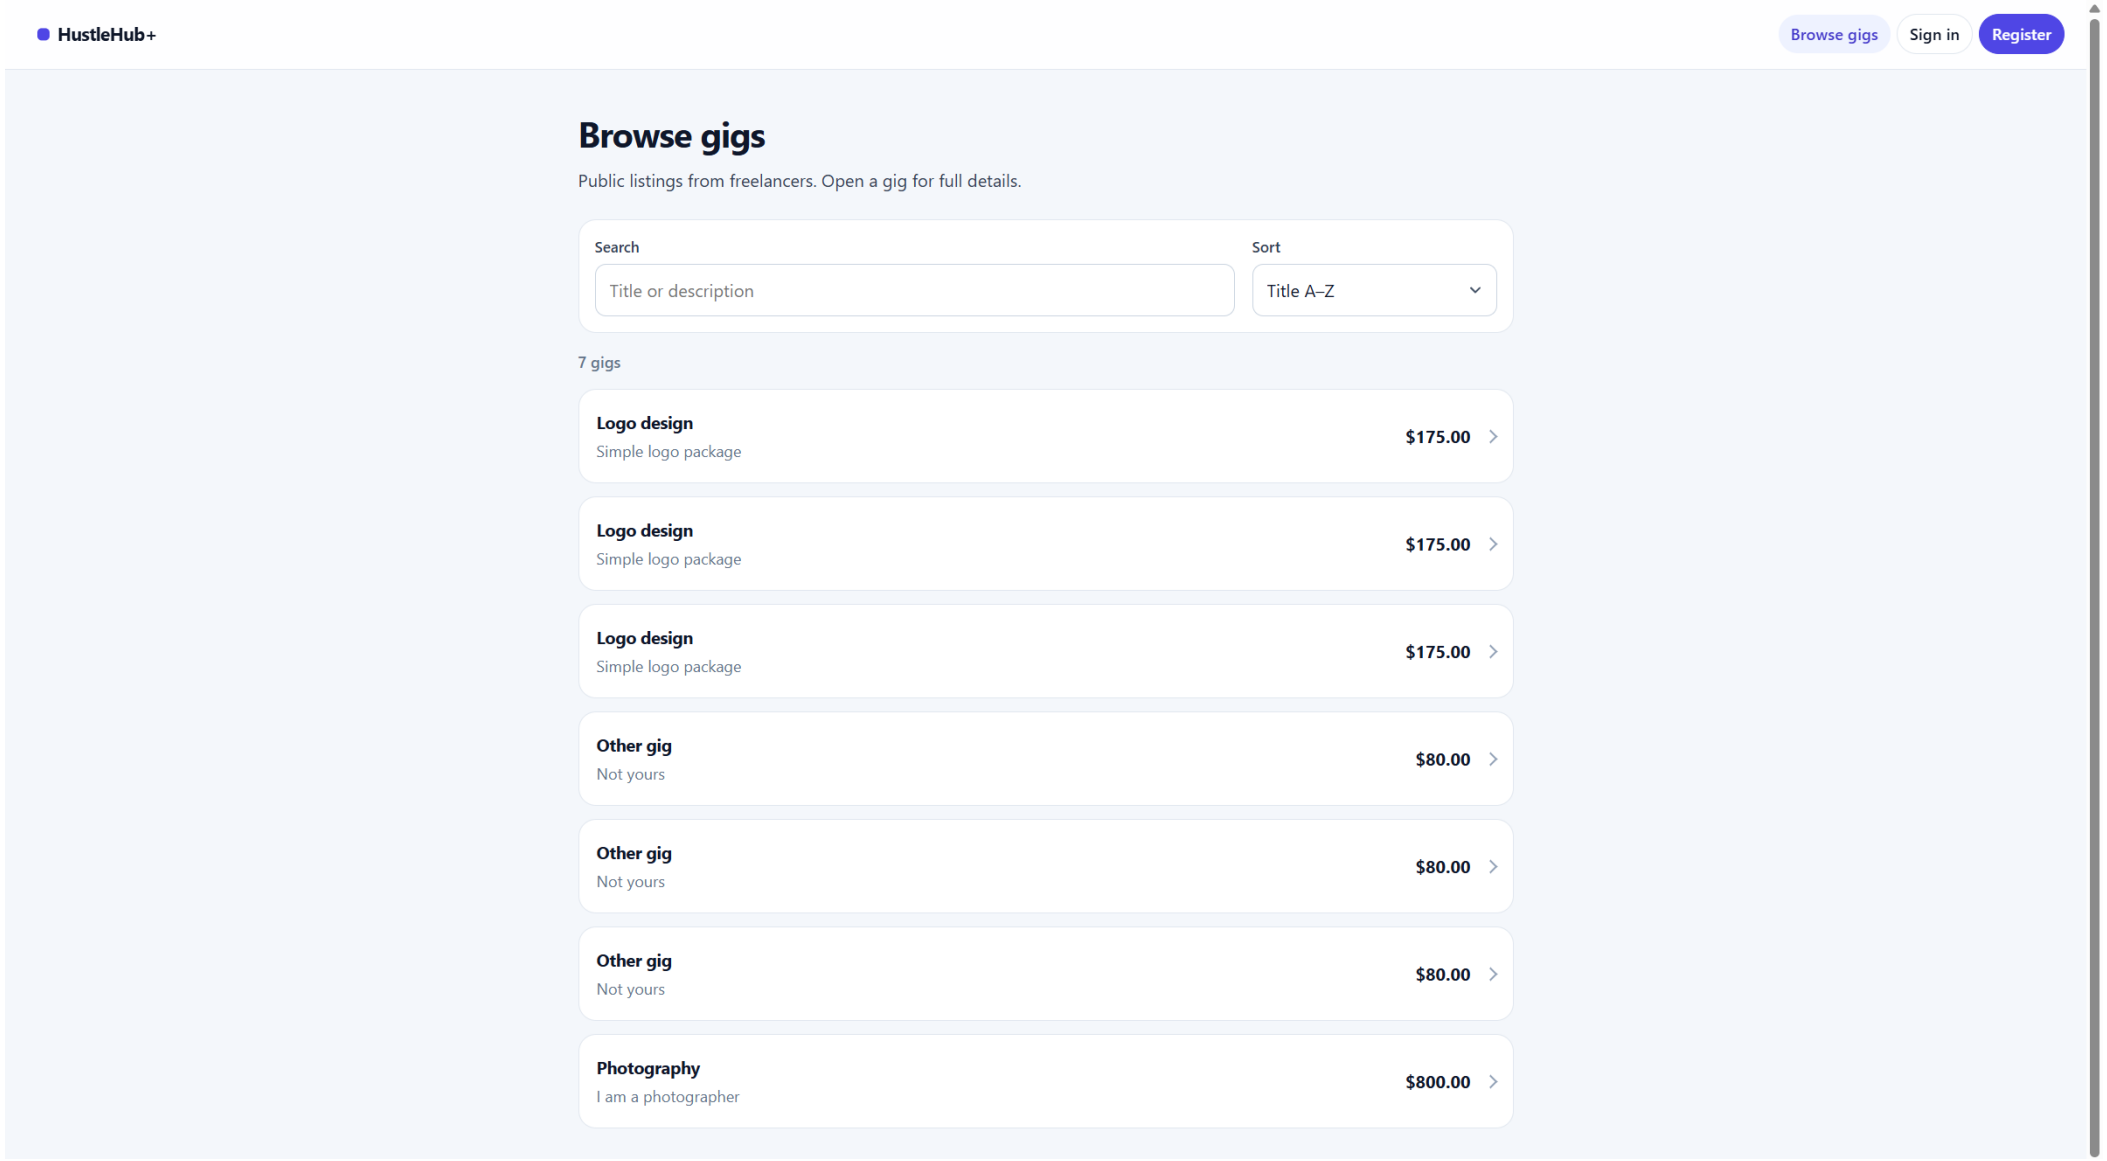

01 Guest home

A visitor sees what HustleHub+ is, then browses gigs or creates an account.

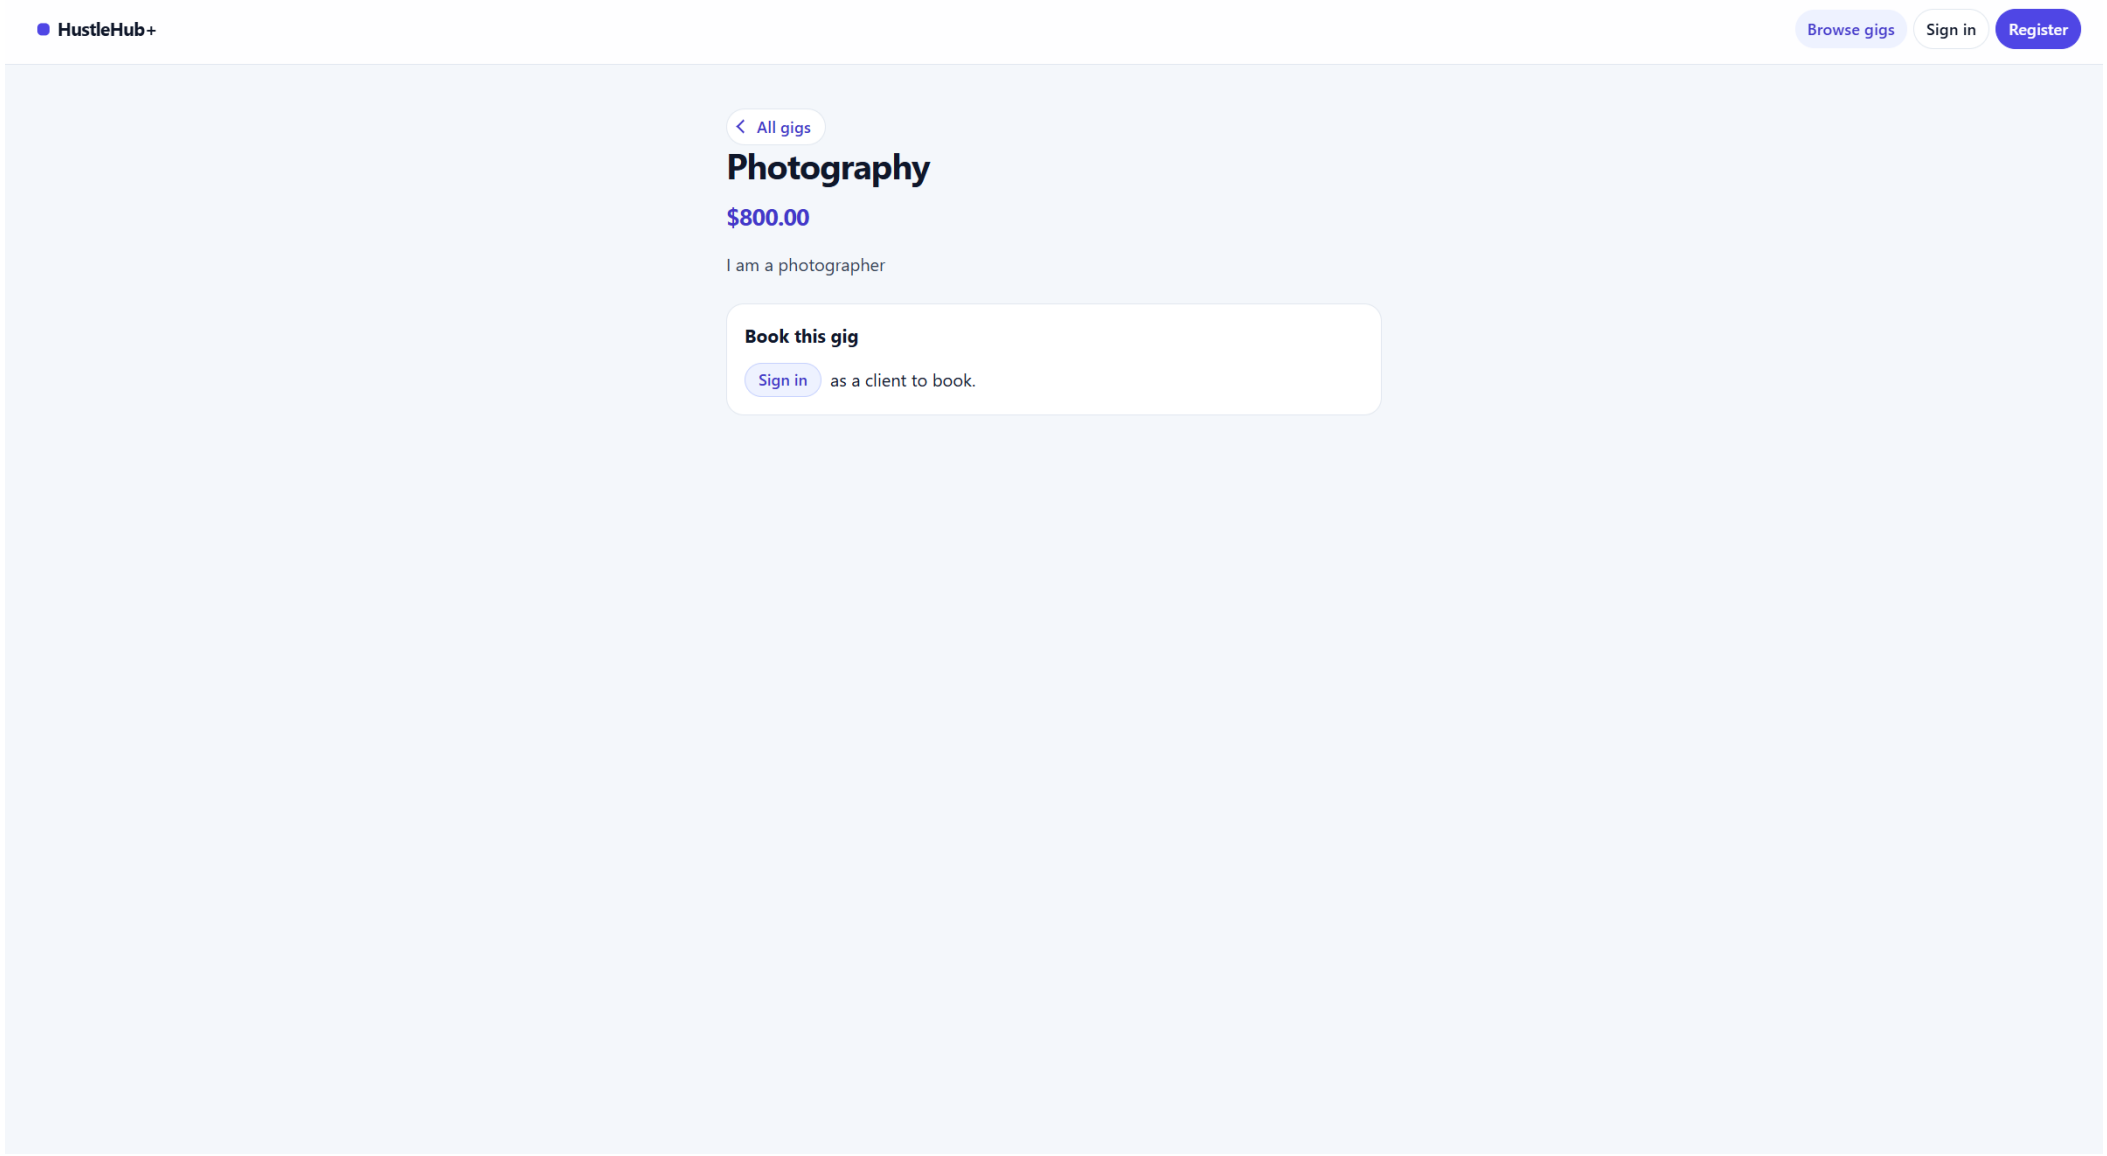

02 Browse gigs

The public catalog lists fixed-price gigs. Search and sort stay on this page.

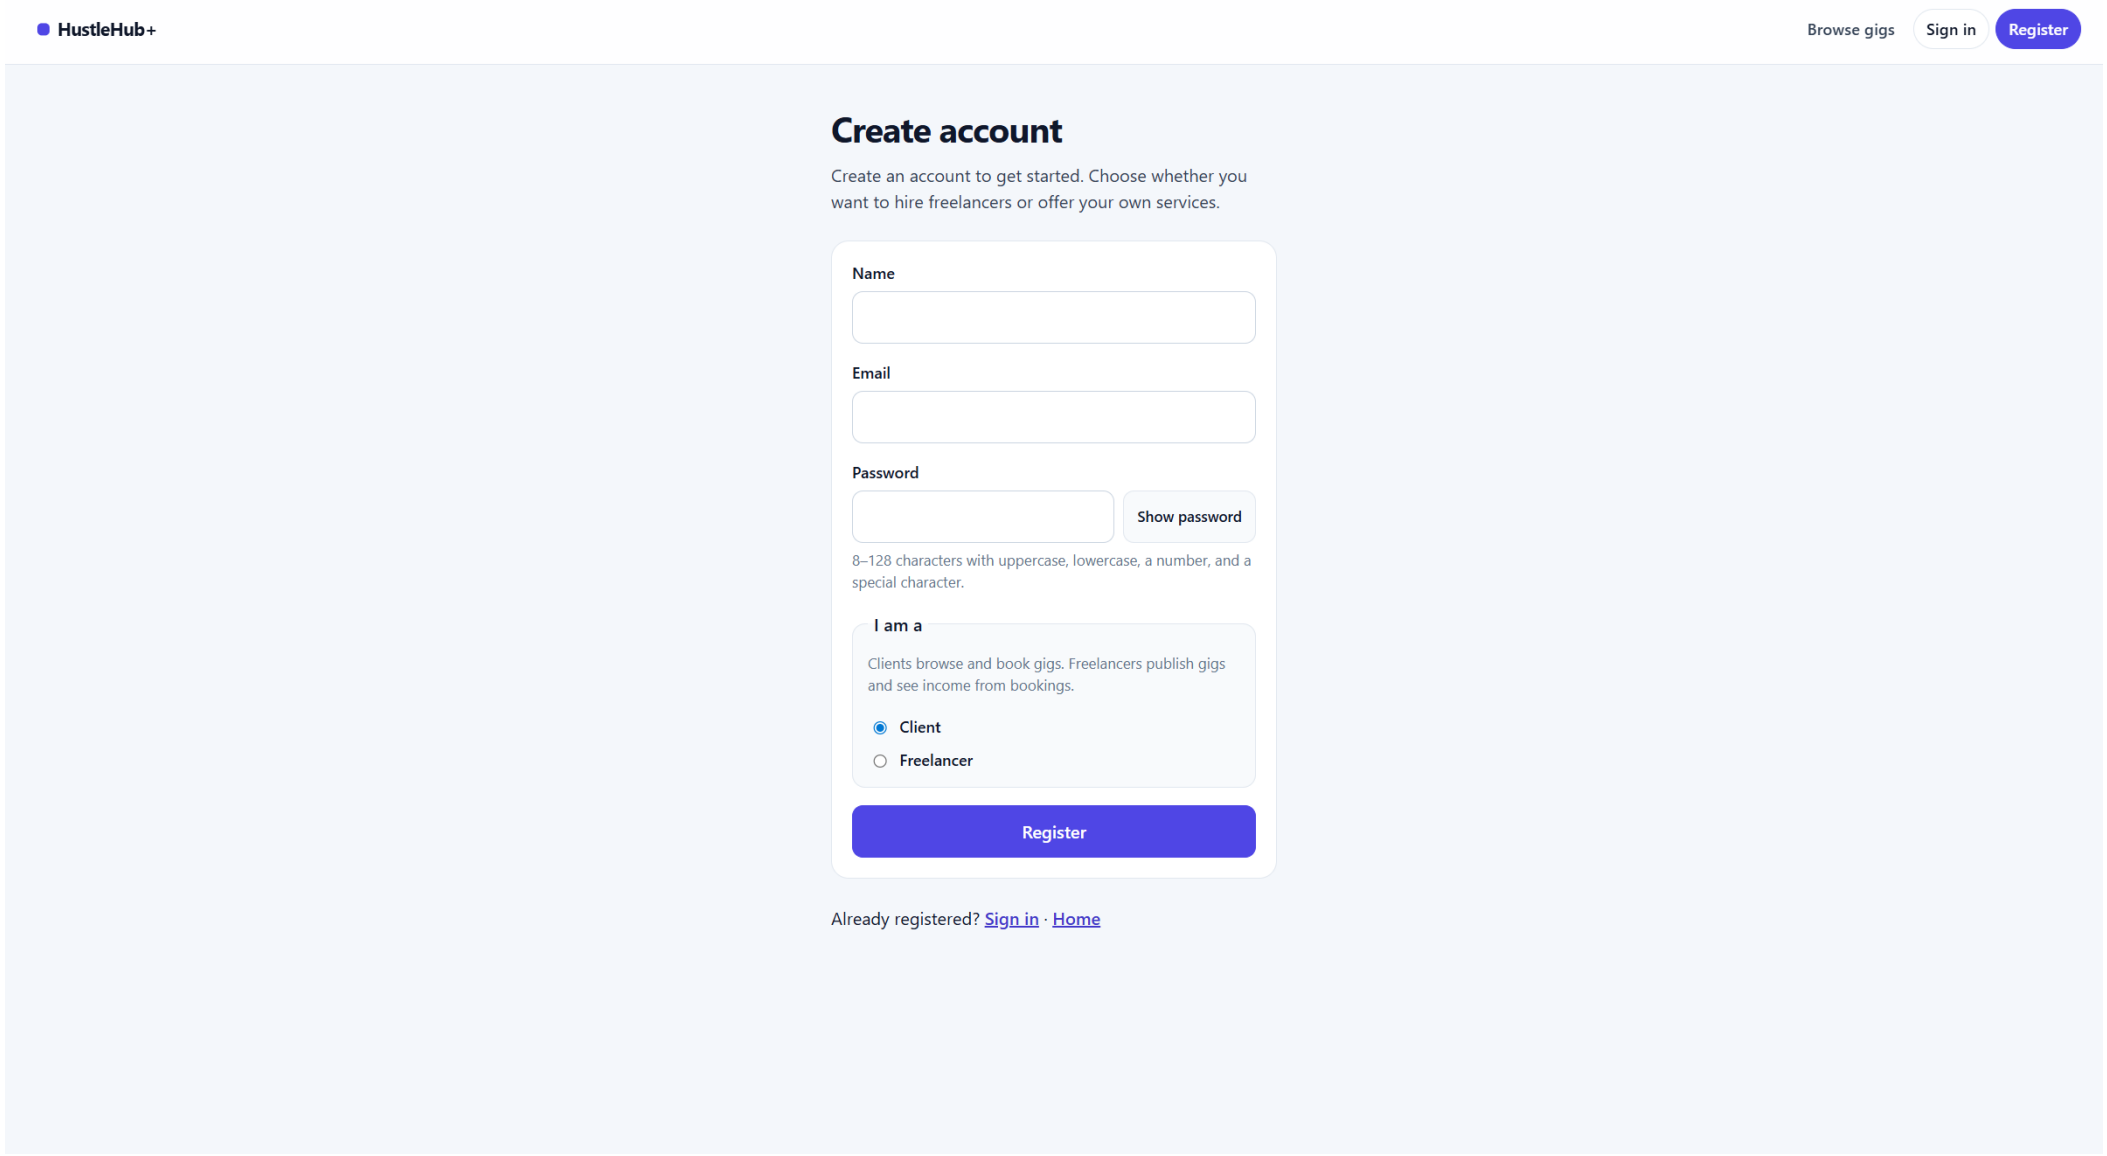

03 Gig detail

Opening a gig shows the price and description. Guests sign in as a client before booking.

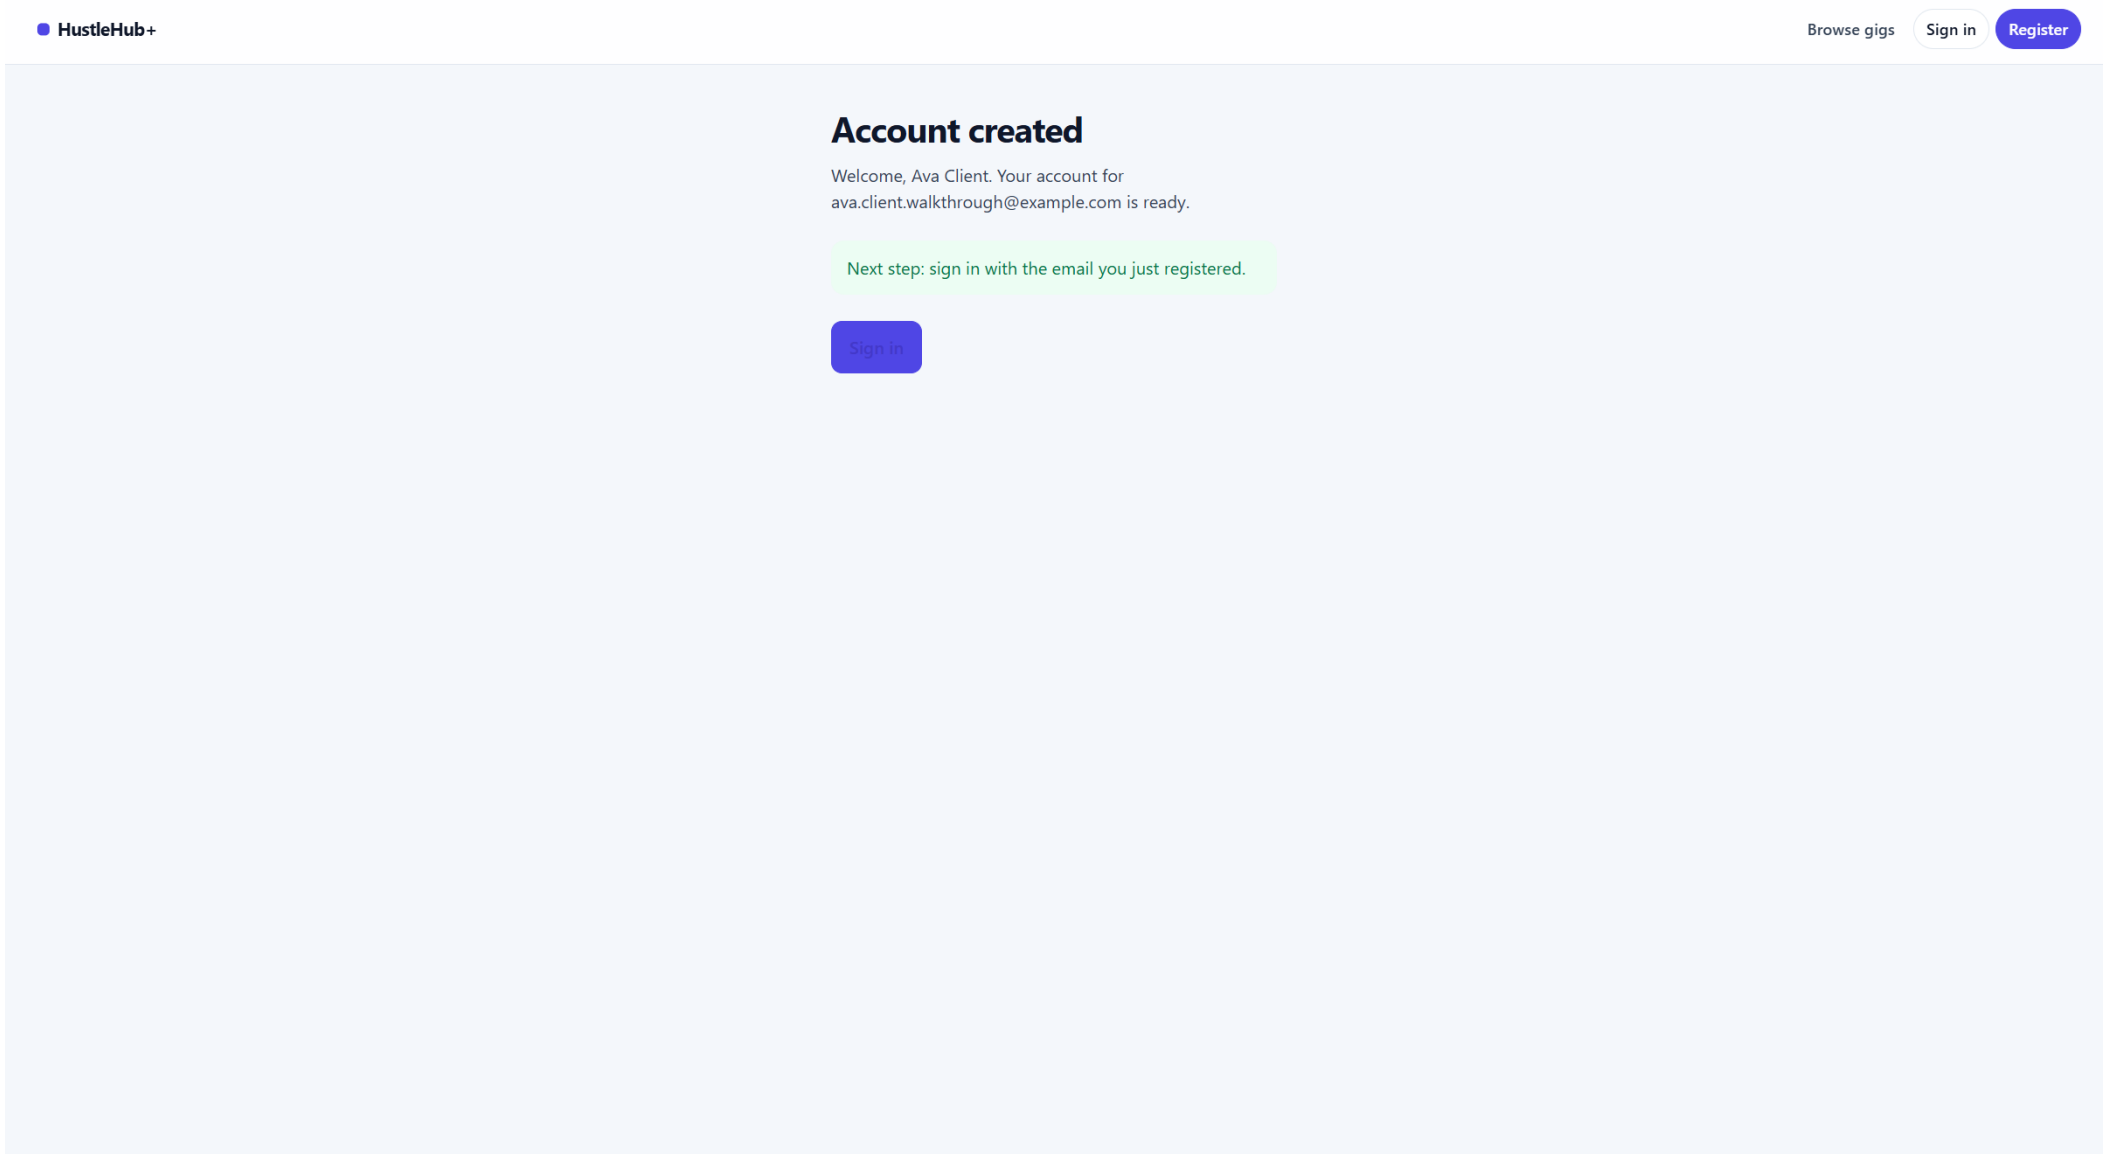

04 Create an account

Registration asks for a name, email, and password, then a role: client or freelancer.

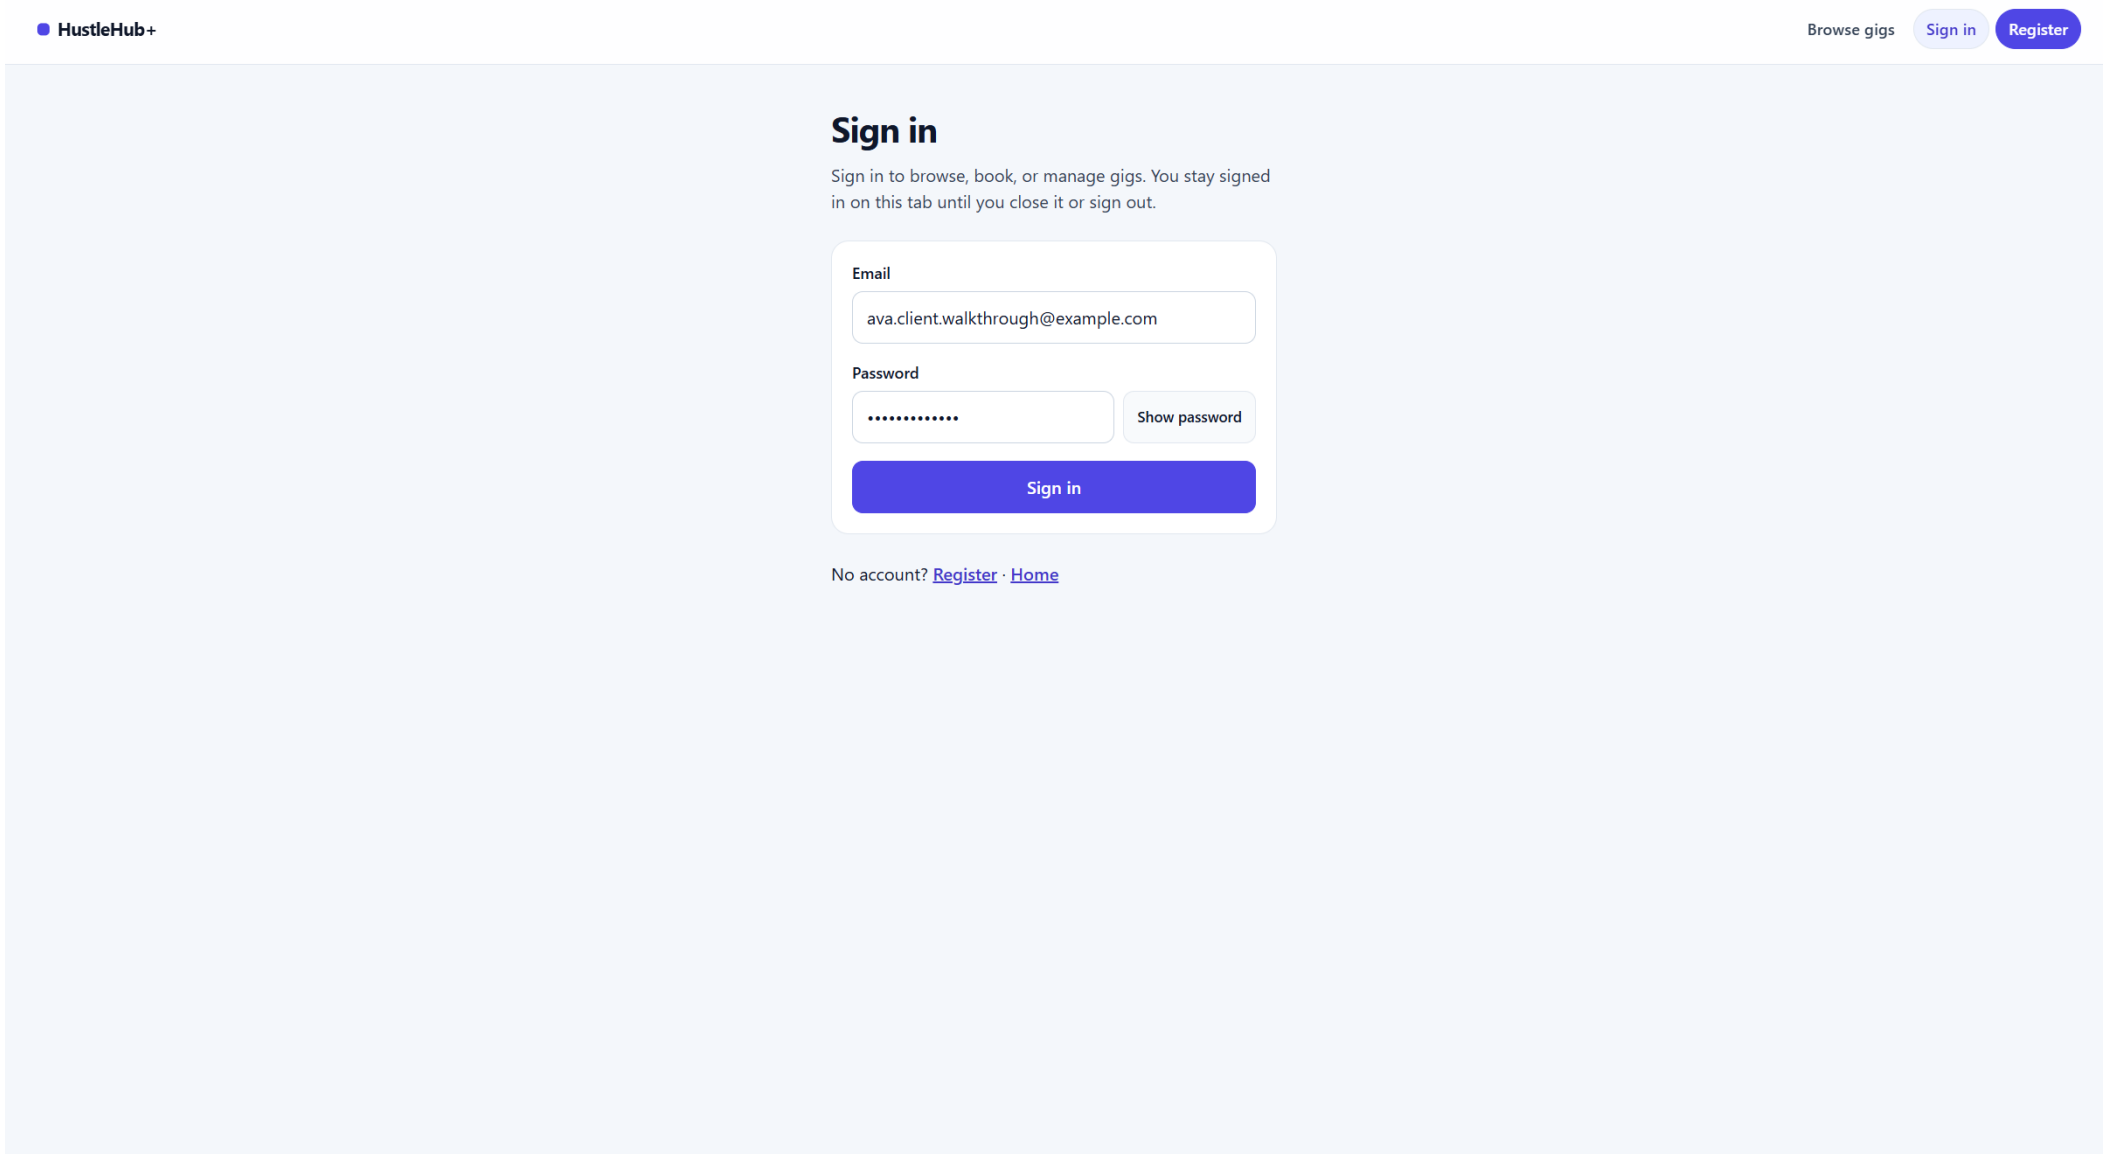

05 Account created

The new account is ready. The next step is to sign in with that email.

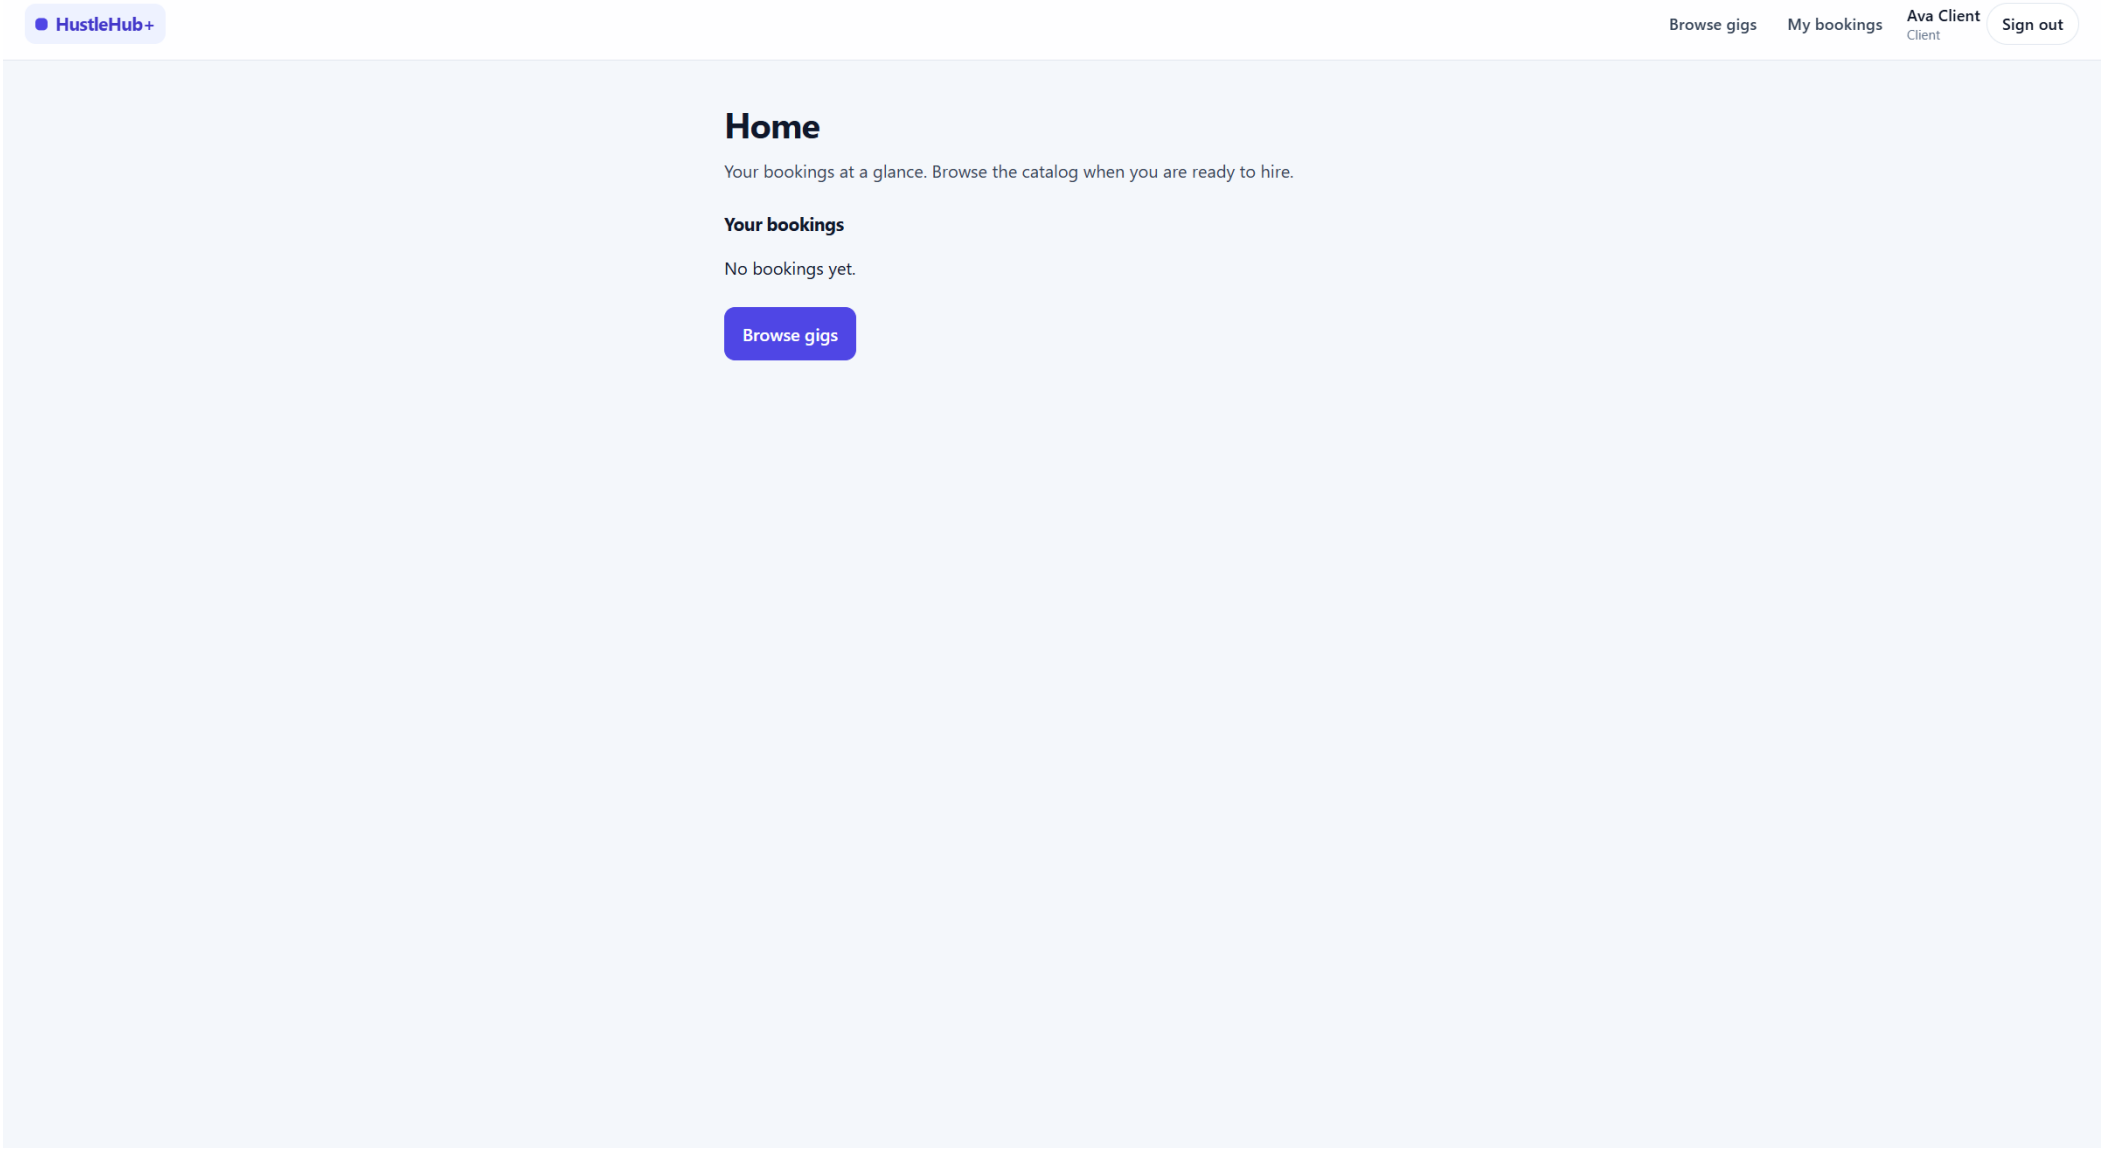

06 Sign in

Sign-in keeps the session in this browser tab until the user signs out or closes it.

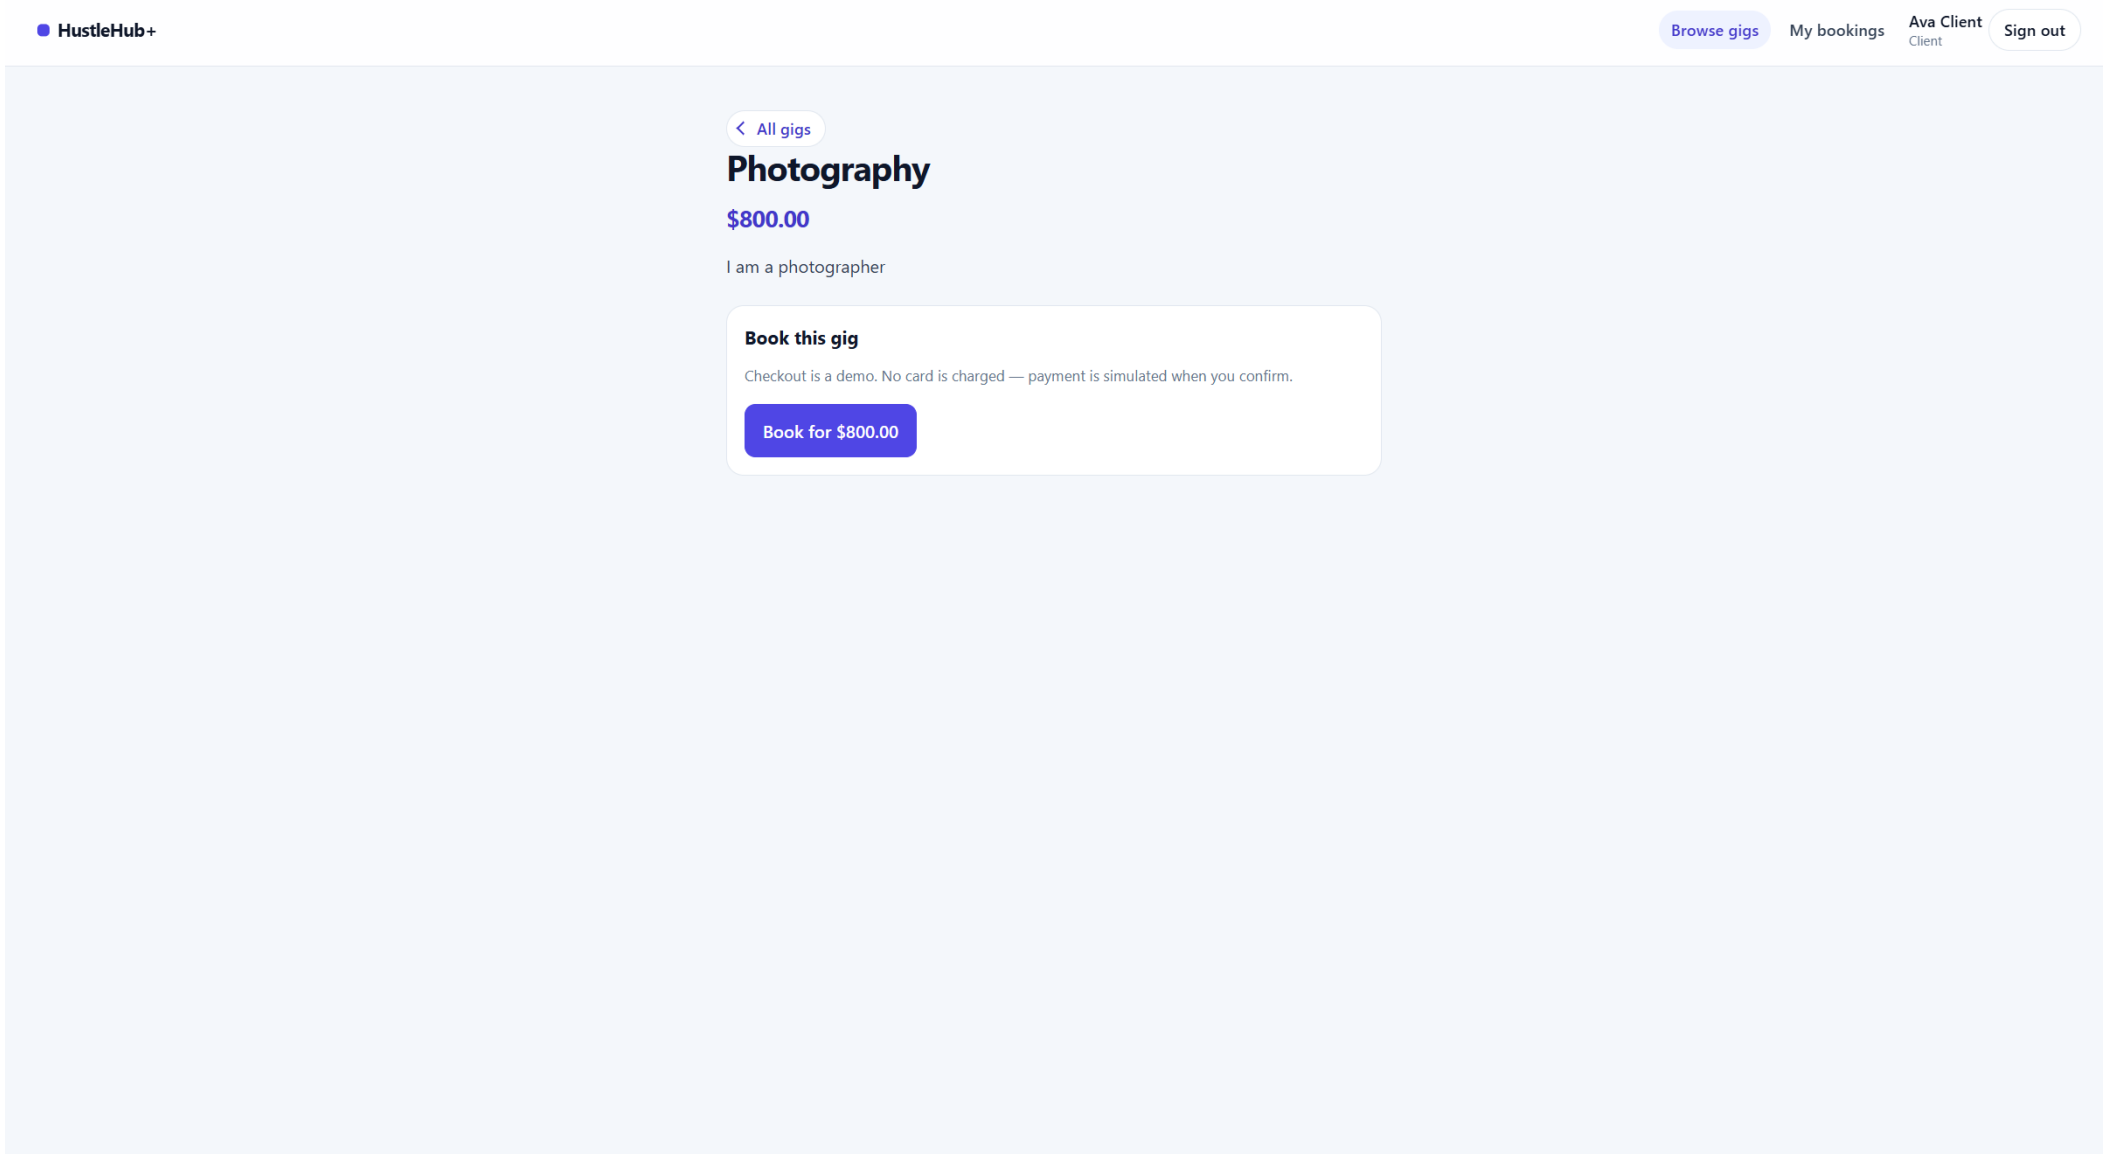

07 Client home

A signed-in client lands on their bookings. This account has none yet.

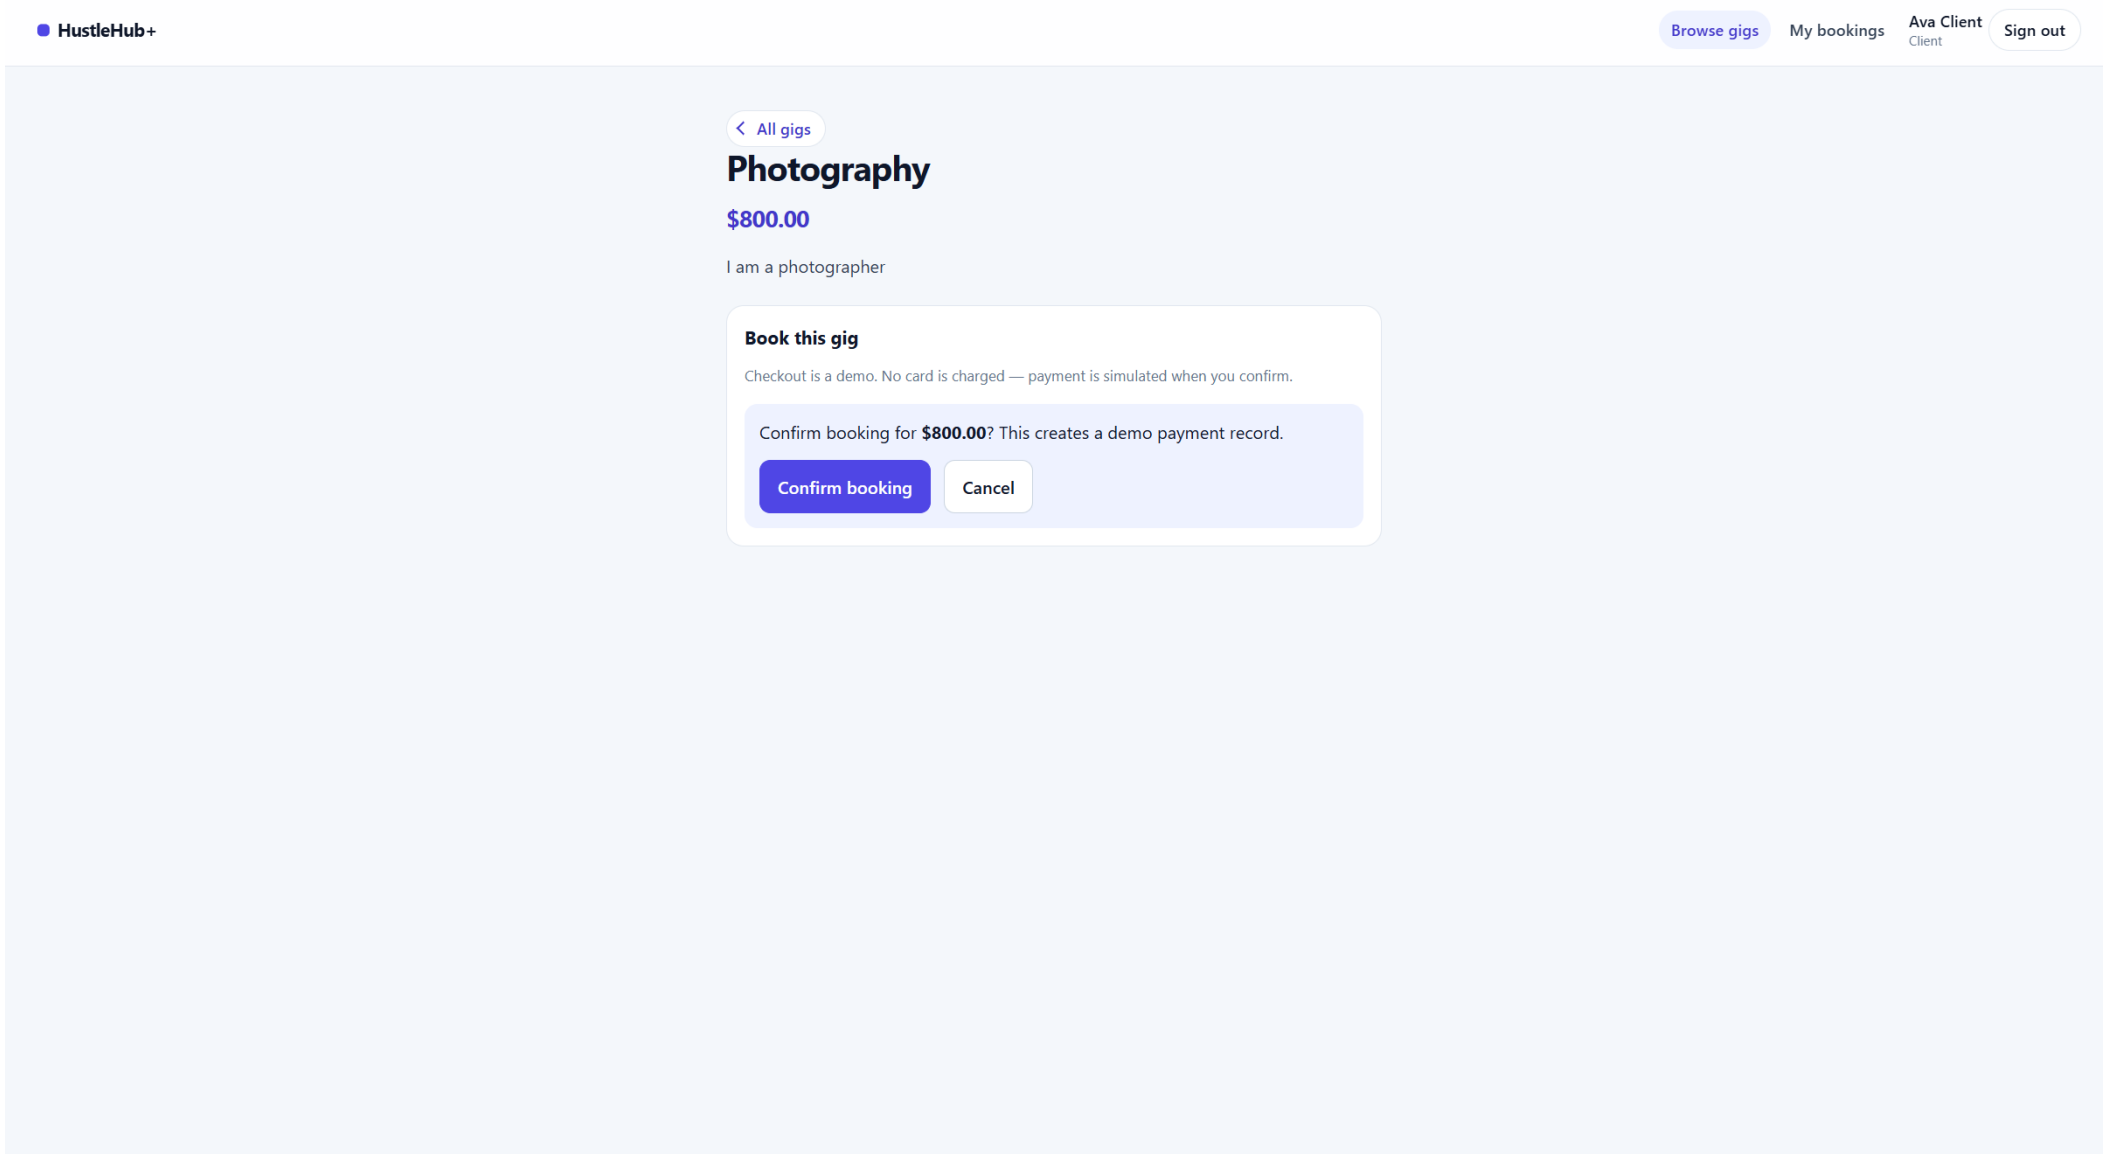

08 Book a gig

Checkout is a demo. No card is charged. Payment is simulated when the client confirms.

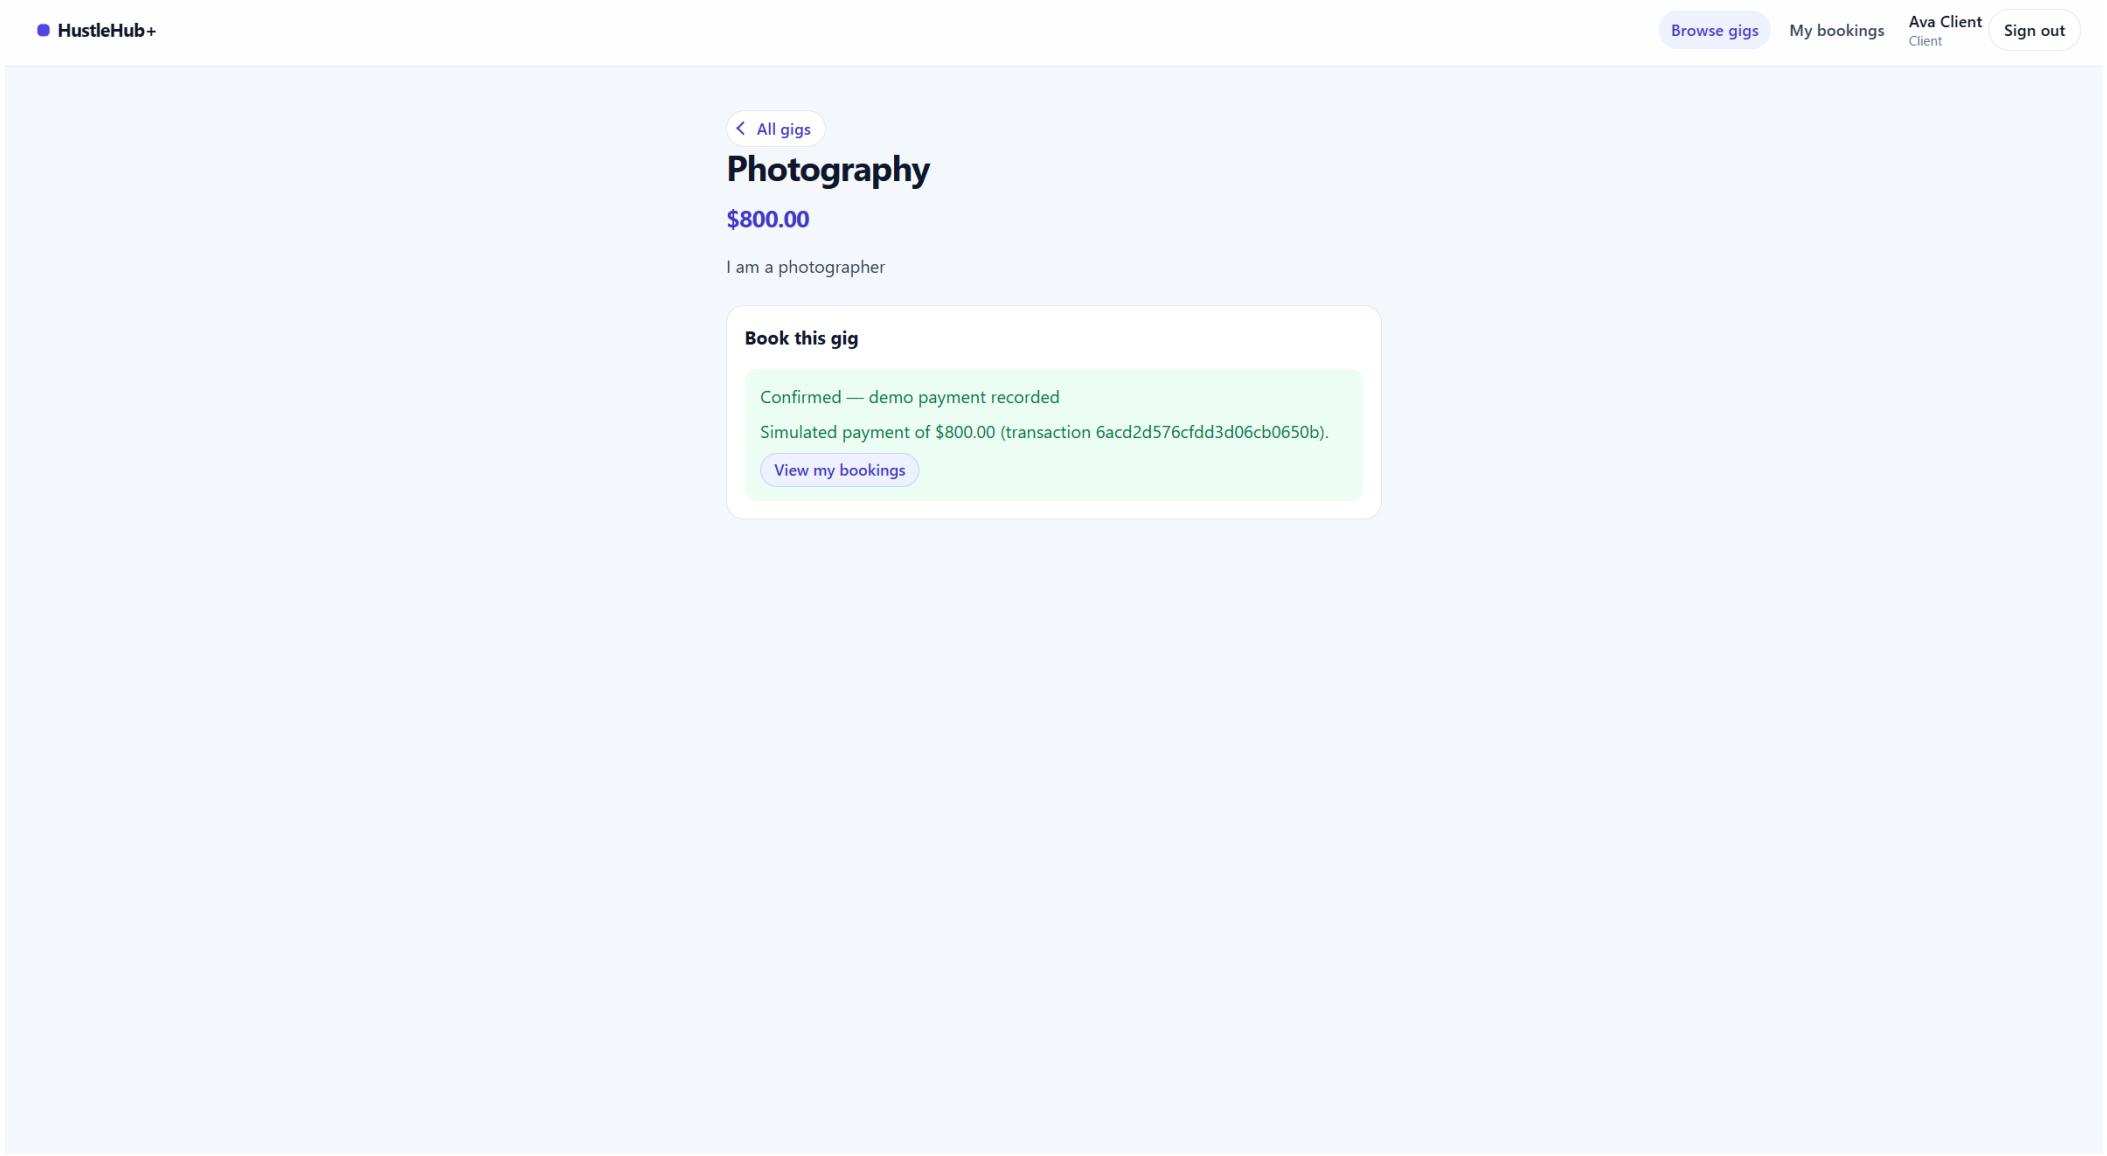

09 Confirm the booking

The client confirms the price before a booking and a demo payment record are created.

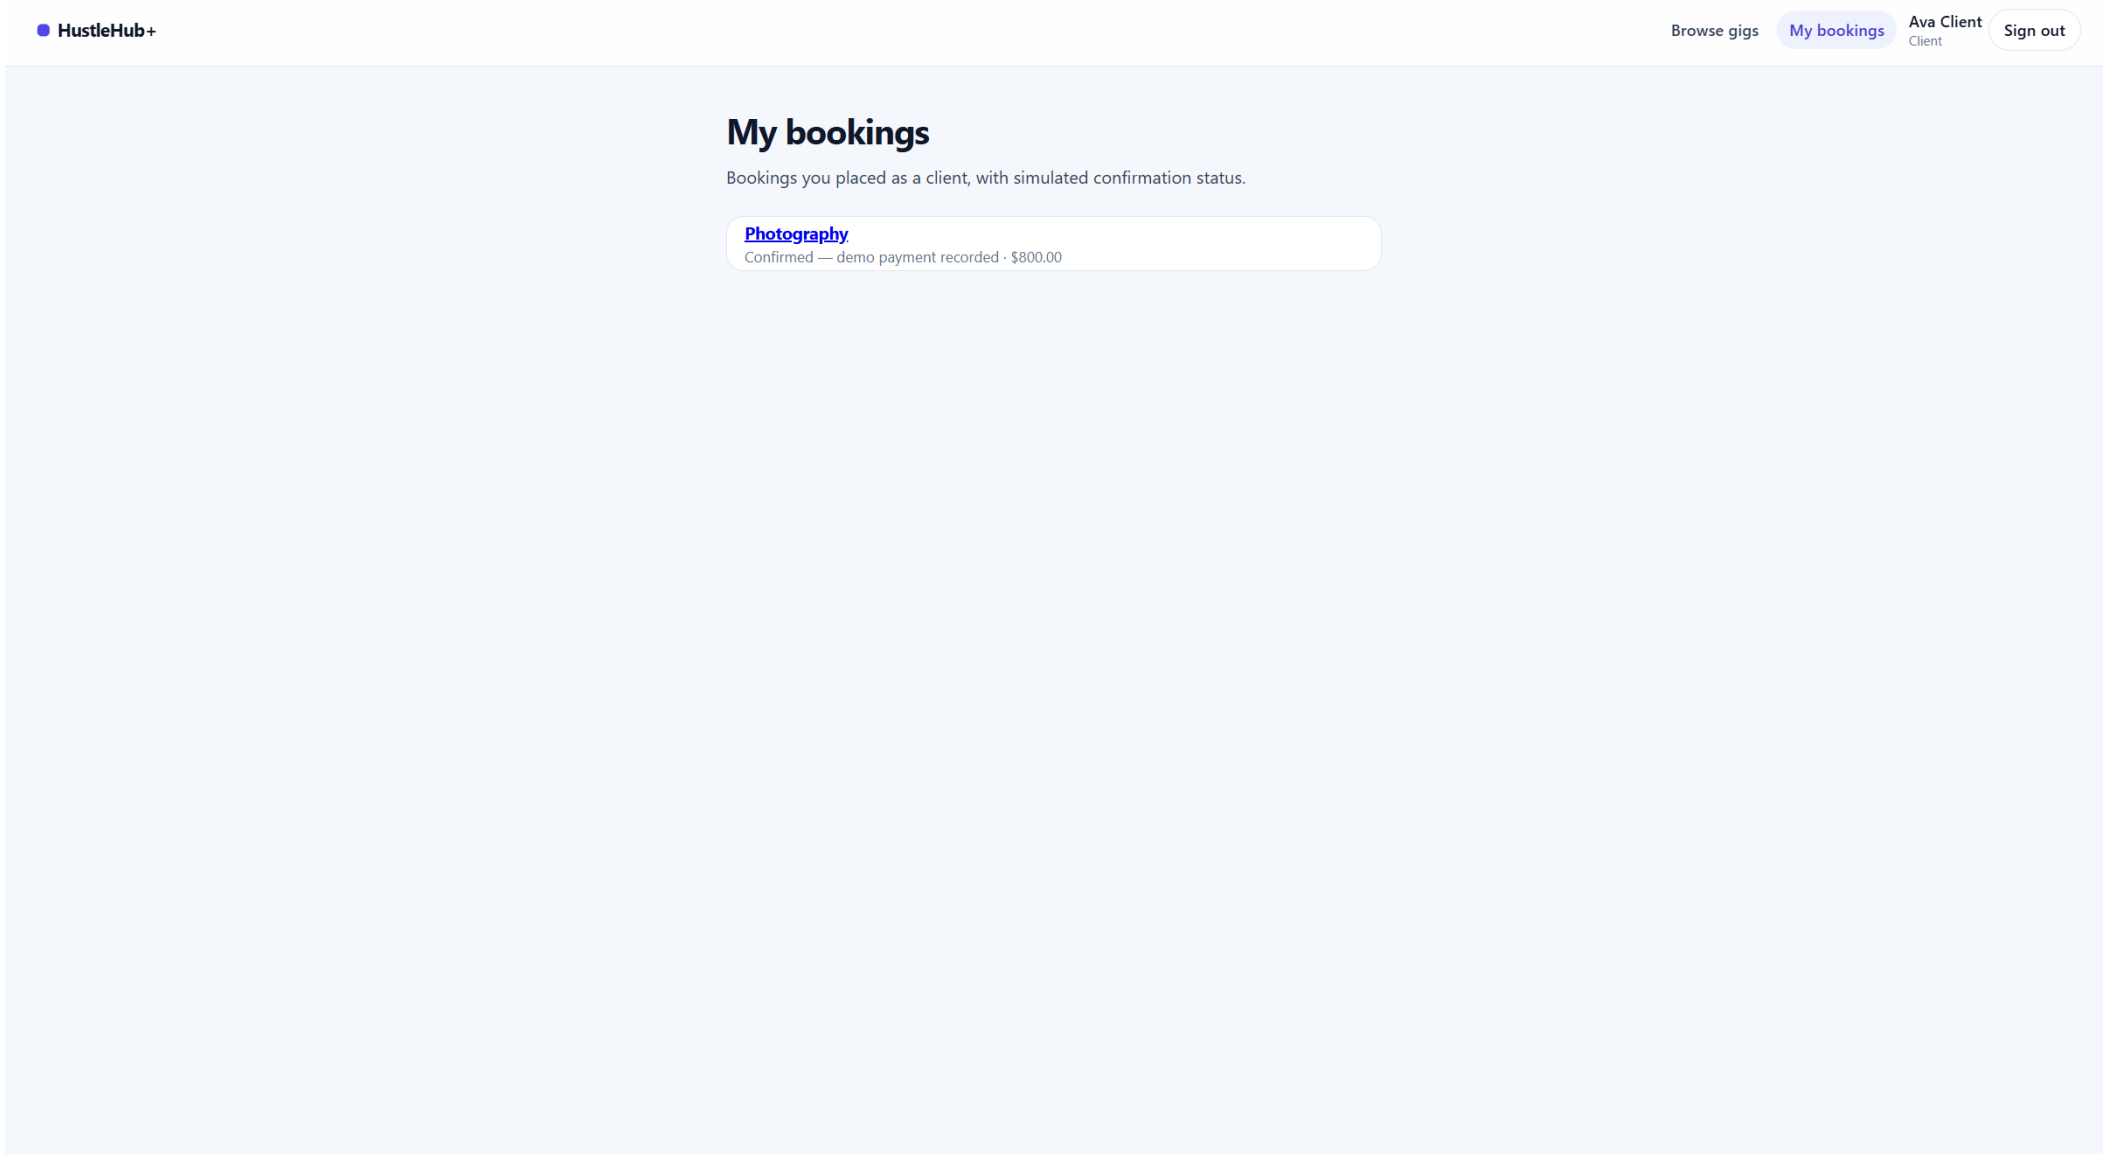

10 Booking recorded

The gig is confirmed and a simulated payment is stored with a transaction id.

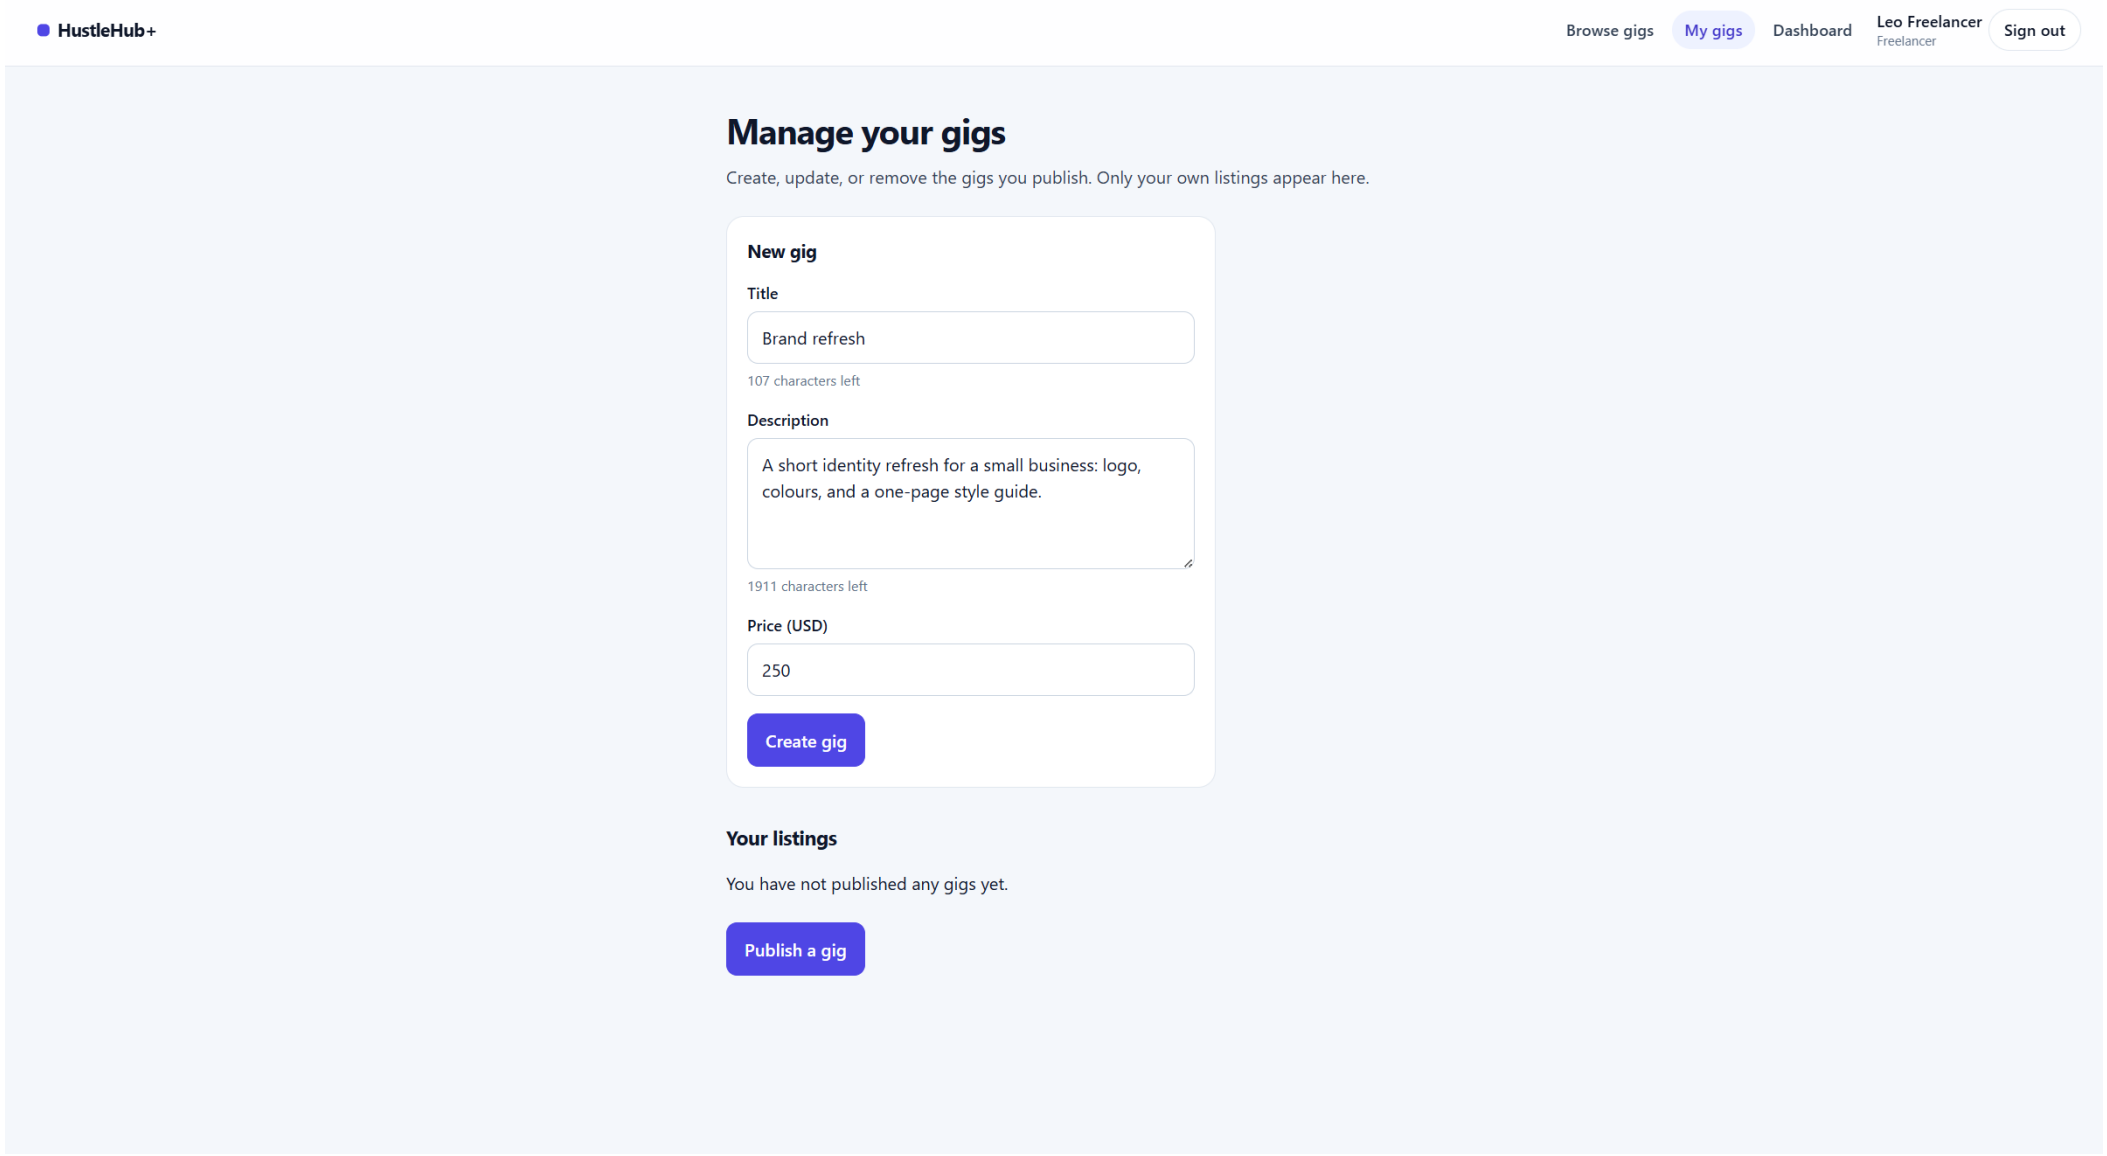

11 My bookings

The client can review bookings they placed, with the demo confirmation status.

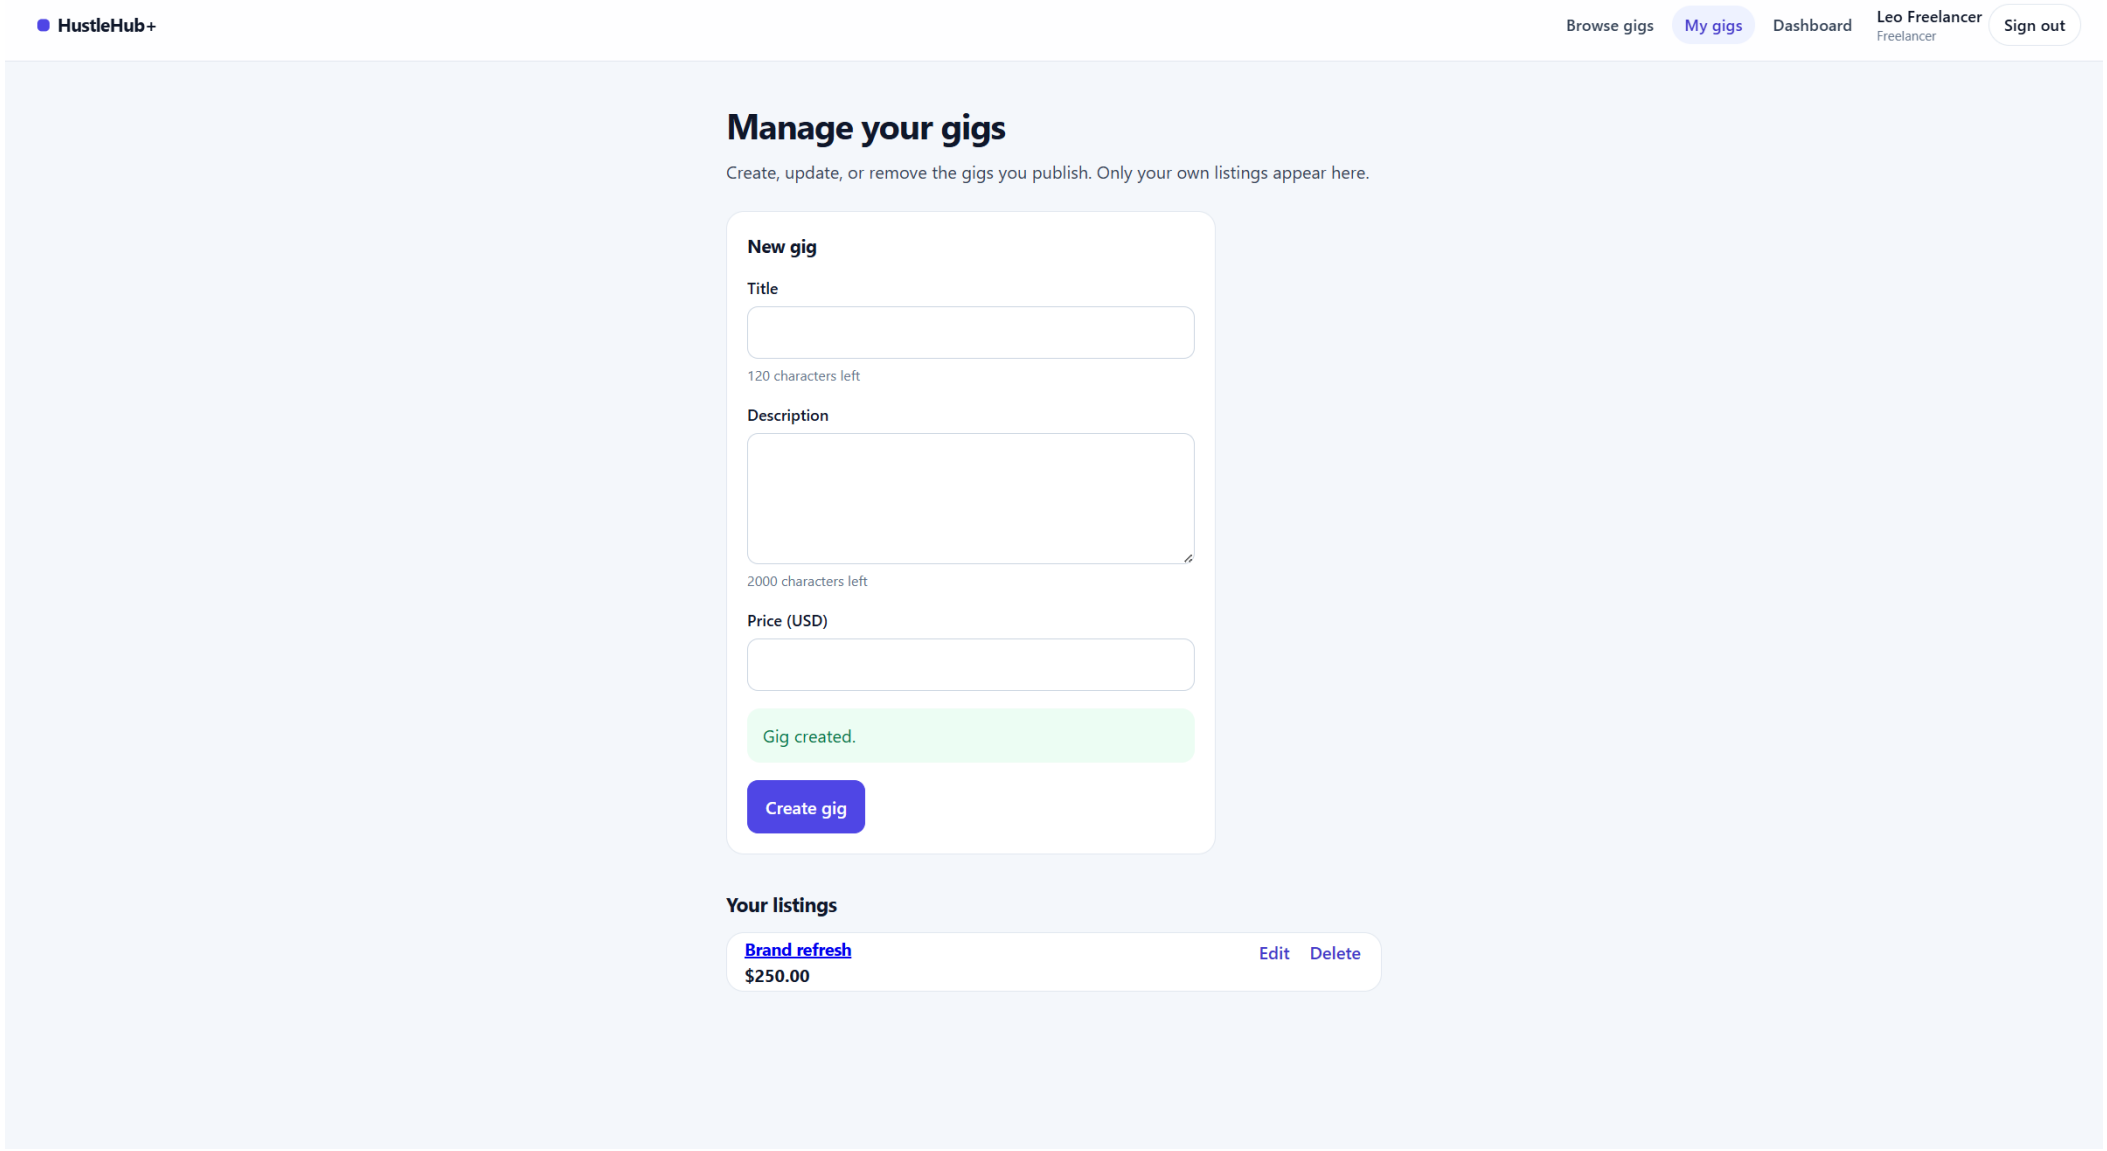

12 Publish a gig

A freelancer signs in and adds a title, description, and price.

13 Listing saved

The new gig appears in the freelancer's own listings, where they can edit or delete it.

14 Freelancer dashboard

After a client books that gig, income and the booking show on the freelancer dashboard.
